- To activate this: modify the import priority in your websites dashboard

First option: odoo is leading to determine visible or not on site (manage on product level in odoo visible yes or no)

Second option: dashboard is leading to determine visible or not (neglect odoo setting and manage visibility in dashboard website)

- Product content/images
    - If Consumer Electronics product and available in icecat: autocompletion
    - Otherwise
        - Product by product (import to discuss with digitalmind)
        - Via import/export in dashboard website
    - Only description can be added via the import or manual. Specs are not available (only description, in front end topspecs, via excel or editor)
- Orders own products: normal flow to butler and automatically created in connect erp
